MEMORANDUM FOR: Deputy Director for Intelligence

FROM:

25X1

Director of Scientific and Weapons Research

SUBJECT:

~~OSWR Support To The White House~~

I thought you would be interested in the rather unique support OSWR recently provided to the White House. Last week, [ ] an analyst in the general purpose weapons area met with Secret Service and US Park Service engineers, at the request of John Flinn, Chief, Munitions Countermeasures, U.S. Secret Service, and reviewed with them the potential damage to the White House from terrorists' weapons. [ ] provided technical data on the blast effects of selected weapons, such as those used by terrorists in Lebanon, and made recommendations on materials and construction techniques to provide personnel protection with minimal impact on the White House decor. He will review preliminary designs for structural modifications next month, before contract bids are solicited by the Park Service. [ ]

25X1

25X1

[ ] is an internationally recognized ordnance expert and was involved in ordnance research [ ] prior to joining this agency last year. While [ ] he served as a consultant to the FBI and other US Government agencies on explosive ordnance disposal and terrorist issues. Although this activity is not directly related to [ ] current assignment, it is important and we have encouraged him to continue this type of support to other agencies. [ ]
